THEORETICAL AND MATHEMATICAL PHYSICS

Volumes 18-21, 1974

(A translation of Teoreticheskaya i Matematicheskaya Fizika)

A

Adzhemyan, L. Ts.—274, 398
Akulov, V. P.—28
Alimov, A. L.—837
Amisov, R. Kh.—116
Anitkin, S. A.—1058
Aref'eva, I. Ya.—1165
Arkhipov, A. A.—536
Asanov, R. A.—667
Auslender, M. I.—1198

B

Balabanyan, G. O.—92, 802
Balakhonov, N. F.—381, 1131
Barabanov, A. F.—881
Barbashov, B. M.—340
Basuev, A. G.—129
Belinieher, B. I.—849
Belokrov, V. V.—413
Blokhintsov, D. I.—1041
Bogolyubov, N. N.—1125
Bolokhov, A. A.—225
Bolotin, N. K.—1035
Borisov, A. B.—1179
Borisov, N. V.—325
Borodin, I. P.—1023
Botoshan, N. I.—579
Braun, M. A.—151
Bulinskii, A. V.—528
Buslaev, V. S.—465

C

Chalyi, A. V.—515
Chernikov, N. A.—219
Chetyrkin, K. G.—841
Chistyakov, N. L.—714
Chudinovich, I. Yu.—729

D

Damaskinskii, E. V.—745
Dao, Vong, Dyc.—768
Demikhovskii, V. Ya.—812
Demkov, Yu. N.—981
Devdariani, A. Z.—981
Dobrushin, R. L.—782
Donav, F.—704
D'orfel, B.—841
Drenska, S. B.—677
Dyakin, V. V.—49

E

Eides, M. I.—151
Elyutin, P. V.—477
Enkovskii, L. L.—862

F

Faddeev, L. D.—1046, 1165
Fal'ko, I. I.—1009
Frolov, V. P.—1088
Fedorov, F. I.—233
Filippov, A. T.—954

G

Gachok, V. P.—124
Gerdzhikov, V. S.—36, 1065
Gershtein, S. S.—241
Gogokhiya, V. Sh.—954
Gomatam, J.—454
Gonchar, N. S.—124
Gordevskii, V. D.—729
Granovskii, Ya. I.—185
Grib, A. A.—349, 520
Grigin, A. P.—281
Grigor'ev, V. I.—46
Gvozdikov, V. M.—1009

I

Isakov, S. N.—1131
Iutin, N. N.—714
Ivanov, L. N.—824
Ivanov, M. I.—677
Ivanov, S. S.—332
Ivanova, E. P.—824

J

Jolos, R. V.—704, 873

K

THEORETICAL AND MATHEMATICAL PHYSICS

Volumes 18-21, 1974

(A translation of Teoreticheskaya i Matematicheskaya Fizika)

Volume 18, Number 1 January, 1974

	Engl.	Russ.
Axiomatic Method in Quantum Electrodynamics – L. D. Solov'ev	1	3
Physical Symmetries in a Theory of Local Observables of the P Class – Yu. M. Zinov'ev and V. N. Suskho	9	14
The R Operation in the $\lambda\varphi$ Theory as a Consequence of an Indefinite Metric in the Extended Space of States (Lowest orders) – O. I. Zav'yalov and P. B. Medvedev.	19	27
Goldstone Fields with Spin 1/2 – V. P. Akulov and D. V. Volkov	28	39
Low-Energy for Photons and Infrared Divergences – V. S. Gerdzhikov and P. P. Kulish	36	51
Example of a One-Time Many-Particle Relativistic Wave Equation – S. N. Sokolov	39	56
Allowance for Field Reaction in Quantum Theory – V. I. Grigor'ev	46	66
Properties of the Eigenfunctions of a Schrodinger Operator with Periodic Potential in the Presence of a Magnetic Field – V. V. Dyakin	49	70
Diagram Method of Constructing Solutions of Bogolyubov's Chain of Equations – D. N. Zubarev and M. Yu. Novikov	55	78
Separation of "Normal" and "Superfluid" Motions in the Schrodinger Equation by Means of the Method of Displacements and Collective Variables – N. A. Vakarchuk and I. R. Yukhnovskii	63	90
Interaction of Conduction Electrons with an External Electromagnetic Field in the Gage-Invariant Theory of Combined Resonance – V. P. Kalashnikov.	76	108
Flux Operators of Physical Variables and the Method of Quasiaverages – S. V. Peletminskii and A. I. Sokolovskii	85	121
Construction of Generalized Normal Solutions of Kinetic Equations for a Mixture of Gases – G. O. Balabanyan and A. D. Khon'kin.	92	130
Classical Kinetic Equation for a Nonequilibrium Particle in a Thermal Bath – I. P. Pavlotskii	98	138

Volume 18, Number 2 February, 1974

	Engl.	Russ.
Straight-Line Path Method and the Eikonal Problem – S. P. Kuleshov, V. A. Matveev, A. N. Sisakyan, M. A. Smondyrev, and A. N. Tavkhelidze.	103	147
On the Removal of Cutoffs in the S Matrix – V. A. Shcherbina	114	161
Existence of Green's Functions in the Euclidean Domain for the $P(\varphi)_2$ Theory – V. P. Gachok and N. S. Gonchar	124	174
Method of Summing the Perturbation Series in Scalar Theories – A. G. Basuev and A. N. Vasil'ev.	129	181
Feynman Quantization and the S Matrix for Spin Particles in Riemannian Spacetime – M. B. Menskii.	136	190
Low-Energy Theorems in S-Matrix Electrodynamics – G. P. Pron'ko.	145	203
N-Reggeon Vertex for Generalized Veneziano Models – M. A. Braun, Z. Katona, and M. I. Eides.	151	212
Massive Vector Field as a Source of Space-Time Torsion – V. E. Rochev.	160	226
Spectral Theory of Kirkwood–Salzburg Equations in a Finite Volume – L. A. Pastur	165	233
Thermodynamic Effects Associated with Scattering on a Heavy Component – S. S. Krotov	172	243

	Engl./Russ.	
Two-Particle Green's Functions in the Theory of an Electron Gas — V. D. Ozrin and V. P. Oleinikov	178	252
Different Forms of the Electron Propagator in the Coulomb Field — Ya. I. Granovskii and V. I. Nechet	185	262
Calculation of Scattering Amplitudes Near Resonance — A. P. Kochkin	189	267
Nonlinear Theory of Combined Resonance and Polarization of Nuclei in Semiconductors with the CdS Lattice — V. P. Kalashnikov and I. I. Lyapilin	194	273
A Method for Calculating Time Correlation Functions — R. R. Nigmatullin	204	286

Volume 18, Number 3 March, 1974

Proof of the 3-Irreducibility of the Third Legendre Transform — Yu. M. Pis'mak	211	299
Conformal Momentum — N. A. Chernikov and N. S. Shavokhina	219	310
Nonlinear Realizations of the Group of Spontaneously Broken Conformal Symmetry — A. A. Bolokhov	225	318
On Matrix Elements of Quantum Electrodynamics — F. I. Fedorov	233	329
Asymptotic Equality of Mean Multiplicities of Particles in Crossed Inclusive Processes — S. S. Gershtein, A. A. Logunov, and M. A. Mestvirishvili	241	339
On Boson Representation of Angular Momentum. II. — V. V. Mikhailov	243	342
Three-Body Problem in Strong Coupling Theory — S. V. Semenov	251	353
Coefficients of Vector Addition of Class II Representations of SU(n) — G. I. Kuznetsov	261	367
Algorithm of Rayleigh–Schrödinger Perturbation Theory for Hermitian Operators — Yu. I. Polyakov	267	374
Nonlinear Generalization of Mori's Method of Projection Operators — L. Ts. Adzhemyan, F. M. Kuni, and T. Yu. Novozhilova	274	383
Application of the Method of Nonequilibrium Thermodynamic Potentials to Systems of Fermions Interacting with Bosons — A. P. Grigin and É. L. Nagaev	281	393
On the Joint Influence of an Electron and a Radiation Field on a Molecule — O. V. Kudrevatova	287	401
Reduced Density Matrices with Nonzero Boundary Conditions in the Case of a Hard Core — K. S. Matviichuk	293	410
Relationship between Mathematical and Physical Constants — A. K. Lorents	305	427

Volume 19, Number 1 April, 1974

Generalized Pauli–Villars Regularization in the Presence of Zero Mass Particles — D. A. Slavnov	307	3
Scaling Behavior of the Amplitude of Virtual Compton Scattering in the Framework of the Dyson–Jost–Lehmann Representation — E. Wieczorek, V. A. Matveev, and D. Rabaschik	315	14
Structure of Canonical Variables in the Theory of Quantum Systems with Finitely and Infinitely Many Degrees of Freedom — N. V. Borisov	325	27
On Equations for the Coefficient Functions of the S Matrix in Quantum Field Theory — S. S. Ivanov, D. Ya. Petrina, and A. L. Rebenko	332	37
Approximate Solutions in the Model $\mathscr{L}_{\text{int}} = h^2\psi^2\varphi^2$ and Equations for Green's Functions on Paths — B. M. Barbashov and V. V. Nesterenko	340	47
Particle Creation from Vacuum by a Nonstationary Gravitational Field in the Canonical Formalism — A. A. Grib, B. A. Levitskii, and V. M. Mostepanenko	349	59
Approximate Solution of the Lee Model in all Sectors — L. A. Luchnikov	362	76
Creation of Fermion Pairs in a Homogeneous Alternating External Field — A. M. Perelomov	368	83
A Remark on the Existence of the Thermodynamic Limit — S. S. Vallander	378	97
Spectrum and Damping of Spin Waves in a Heisenberg Ferromagnet with Single-Ion Anisotropy — N. F. Balakhonov, M. P. Kashchenko, V. N. Kitaev, and L. V. Kurbatov	381	102

	Engl./Russ.
Magnetic Excitations in an Anharmonic Ferromagnetic Crystal — F. Vukajlovich, H. Konwent, and N. M. Plakida	391 115
Method of Bogolyubov's Kinetic Equation in Nonlinear Statistical Hydrodynamics — L. Ts. Adzhemyan, F. M. Kuni, and T. Yu. Novozhilova	398 125
Kinetic Equation for Nonideal Gas with Allowance for Triple Collisions — Yu. L. Klimontovich and E. F. Slin'ko	407 137

Volume 19, Number 2 May, 1974

Two Hundred and Fifty Years of the Academy of Sciences of the USSR	413 147
Ultraviolet Asymptotic Behavior in the Presence of Non-Abelian Gauge Groups — V. V. Belokurov, A. A. Vladimirov, D. I. Kazakov, A. A. Slavnov, and D. V. Shirkov	415 149
"Quasiasymptotics" of Generalized Functions and Scaling of Electromagnetic Form Factors — B. I. Zav'yalov	426 163
Infrared Asymptotic Behavior of the Green's Function — G. P. Pron'ko and L. D. Solov'ev	433 172
Equations for Higher Legendre Transforms in Terms of 1-Irreducible Vertices — A. N. Vasil'ev, A. K. Kazanskii, and Yu. M. Pis'mak	443 186
Simple Calculation of Wigner Rotations as Functions of s and t. Application to Scattering and Crossing Properties — J. Gomatam, L. S. O'Raifeartaigh, and D. H. Chrakian	454 201
Strong Coupling Method in a Scalar SU(3)-Symmetric Theory — A. N. Tolstenkov, N. E. Tyurin, and A. V. Shurgaya	459 208
Coordinate Asymptotic Behavior of the Solution of the Scattering Problem for the Schrödinger Equation — V. S. Buslaev and M. M. Skriganov	465 217
On the Applicability of the Quasiclassical Approximation — P. V. Elyutin and D. V. Krivchenkov	477 233
Renormalized Kinetic Equations for a System with Weak Interaction and for a Low-Density Gas — D. N. Zubarev and M. Yu. Novikov	480 237
Single-Particle Green's Function in an Anisotropic Heisenberg Model III. Spectrum and Damping for Anisotropy of the Easy Plane Type — Yu. G. Rudoi and Yu. A. Tserkovnikov	491 252
Spectrum of Bose System with Condensate Near the Threshold of Decay into Excitations with Parallel Momenta — A. R. Knyazev and Yu. A. Nepomnyashchii.	504 269
Model for Describing the Fragmentation of One- and Many-Particle States over the Levels of an Odd Spherical Nucleus — A. I. Vdovin and V. G. Solov'ev	509 275
Correlations Functions and Dynamical Structure Factor of a Nonisotropic Medium Near the Critical Point — V. M. Sysoev and A. V. Chalyi	515 283
ERRATA	
Article by A. A. Grib, B. A. Levitskii, and V. M. Mostepanenko: Vol. 19, No. 1, 59 (1974)	520

Volume 19, Number 3 June, 1974

Unitarity and Causality in the Case of Generalized Pauli – Villars Regularization — D. A. Slavnov	521 291
On the Continuity Condition for a Group of Internal Symmetries — A. V. Bulinskii	528 300
On the Generating Relations for Spin and Parafield Algebras — Nalini B. Menon and I. V. V. Raghavacharyulu	532 305
One-Time Equation for the Scattering of a Particle on a Bound State in Quantum Field Theory — A. A. Arkhipov and V. I. Savrin	536 310
Approximate Solution of Generalized Lee Model in All Sectors — L. A. Luchnikov	546 325

	Engl.	Russ.
On the Complete Integrability of a Nonlinear Schrödinger Equation – V. E. Zakharov and S. V. Manakov	551	332
Existence Theorem for Solutions of the Bogolyubov Equations – Ya. G. Sinai and Yu. M. Sukhov	560	344
Exchange Effects in Quantum Kinetic Equations for a Nonideal Gas and Nonideal Plasma – Yu. L. Klimontovich and W. D. Kraeft	574	364
Investigation of Electron Densities of States of Superconducting Transition Metals with Nonmagnetic Impurity – N. I. Botoshan, M. I. Vladimir, and V. A. Moskalenko	579	371
Anharmonic Effects in the Dispersion of the Permittivity Tensor of Solid Solutions – A. F. Lubchenko and Nguyen Khan Nyap	593	390
Mobility of a Particle in a One-Dimensional Lattice with Allowance for Some Anharmonic Effects – Yu. A. Kashlev	600	400
Construction of Quasiclassical Approximation for Transport Coefficients in Linear Response Theory – A. N. Lagar'kov and V. M. Sergeev	610	414
Diagram Technique for Hubbard Operators – P. M. Slobodyan and I. V. Stasyuk	616	423

Volume 20, Number 1 July, 1974

	Engl.	Russ.
Scattering of Particles with Allowance for an Interaction with a Quantized Scalar Field – N. E. Tyurin and O. A. Khrustalev	621	3
Macroscopic Observables in Algebraic Statistical Physics – V. M. Maksimov	632	18
Feynman Amplitude and Meijer G Functions. Unified Representation for Divergent and Convergent Graphs – V. I. Kucheryavyi	639	29
S Matrix in Quantum Electrodynamics with External Field – A. I. Nikishov	653	48
Reduction of the Problem of Calculating the Class of Infinite-Multiplicity Integrals in Quantum Field Theory to the Solution of an Integral Equation – L. G. Zastavenko	660	57
Point Source of Massive Scalar Field in Gravitational Theory – R. A. Asanov	667	66
Transformation of Coordinate Inversion in the Theory of Conformal Invariance – Tao Wong Tic	671	71
New Conservation Laws in Strong Interactions in the Framework of Ladder U(6,6) Symmetry – I. S. Vaklev, S. B. Drenska, M. I. Ivanov, and A. V. Nikolov	677	78
On the Construction of Nonequilibrium Entropy. I – S. V. Peletminskii and A. I. Sokolovskii	682	85
Thermodynamic Limit for Many-Temperature Mixtures of Classical Neutral Particles – S. S. Vallander	694	100
Construction of the Collective Hamiltonian in a Microscopic Model of a Nucleus – R. V. Jolos, F. Dönau, and D. Janssen	704	112
Magnetization of Hexagonal Ferromagnets with Single-Ion Anisotropy – N. N. Iutin, A. A. Kazakov, and N. L. Chistyakov	714	126
Kinetic Equations for Electron Systems with Paramagnetic Impurities – V. V. Krasil'nikov, V. D. Tsukanov, and A. A. Yatsenko	719	133
Nonlinear Realization for Symmetry Group with Spinor Parameters – A. I. Pashnev	725	141

Volume 20, Number 2 August, 1974

	Engl.	Russ.
Bogolyubov's R-Operation for Local Interactions – V. D. Gordevskii, O. V. Uvarov, I. Yu. Chudinovich, and V. A. Shcherbina	729	147
Gauge Fields for the ISL(6,C) Symmetry Group – D. V. Volkov and V. I. Tkach	738	160
Euclidean-Covariant Representations of the Nonrelativistic Current Group – E. V. Damaskinskii	745	170
Generalization of Wigner's Theorem on Symmetries in the C*-Algebraic Approach – S. G. Kharatyan	751	177
Diagrammatic Analysis of the Fourth Legendre Transform – A. N. Vasil'ev, A. K. Kazanskii, and Yu. M. Pis'mak	754	181

	Engl./Russ.	
Integral Representation for Electromagnetic Form Factors of Two-Particle Systems – A. I. Kirillov	763	194
General Formulas and Selection Rules for a Conformally Covariant Expansion of an Operator Product – Dao Vong Dyc	768	202
Properties of Unitary and Nonunitary S Matrix on the Basis of Causality and the Completeness Condition of Wave Functions – V. S. Ol'khovskii	774	211
Strong Convexity of the Pressure for Lattice Systems of Classical Statistical Physics – R. L. Dobrushin and B. S. Nakhapetyan	782	223
Asymptotically Exact Solutions for Fermi Systems – I. V. Simenog	791	235
Construction of Kinetic Equations for Nonequilibrium Quantum Systems – G. O. Balabanyan	802	250
Diagrammatic Technique for Calculating Nonlinear Susceptibilities – V. Ya. Demikhovskii and A. P. Kopasov	812	265
Basis Functions for Investigating Collective Motions of Nuclei – D. Ch. Perkauskas, A. K. Petrauskas, and L. Yu. Sabalyauskas	818	274
First-Order Function for Semirelativistic Atomic Equation – L. N. Ivanov and E. P. Ivanova	824	282

Volume 20, Number 3 September, 1974

Gauge Fields for Symmetry Group with Spinor Parameters – D. V. Volkov and V. A. Soroka	829	291
Locality and Lattice Theory – M. A. Solov'ev	835	299
Hamiltonian Form of a Feynman Path Integral – A. L. Alimov	837	302
Scaling Behavior of Deep Inelastic Scattering on Massless Target Particles – E. Wieczorek, B. Dörfel, N. V. Krasnikov, V. A. Matveev, D. Robaschik, and K. G. Chetyrkin	841	308
Bounds on the Elastic Scattering Amplitudes of Weakly Interacting Particles – V. S. Vernov	846	315
Relativistic Wave Equations and Lagrangian Formalism for Particles of Arbitrary Spin – B. I. Belinicher	849	320
Partial-Wave Analysis of Dual Amplitude with Mandelstam Analyticity – L. L. Enkovskii	862	338
Bogolyubov's Method in the Problem of Pairing Vibrations and the Problem of Eliminating Unphysical States – R. V. Jolos, V. G. Kartavenko, and V. Rybarska	873	353
Diagram Technique for the Anderson Model – A. F. Barabanov, K. A. Kikoin, and L. A. Maksimov	881	364
Nonequilibrium Entropy and Definition of Products of Generalized Functions. II – S. V. Peletminskii and A. I. Sokolovskii	893	381
Mixtures of Bose Liquids – Yu. A. Nepomnyashchii	904	399
Investigation of Invariants of a Many-Particle System by the Method of Projection Operators – R. M. Yul'met'ev	914	413
Equations Describing the Ionization of an Atom in the Field of a Strong Electromagnetic Wave – V. A. Pazdzerskii	923	426

Volume 21, Number 1 October, 1974

Equations for Green's Functions Obtained from a Variational Principle – A. K. Kazanskii	927	3
Two-Body Problem in Adiabatic and Strong Coupling – E. P. Solodovnikova and A. N. Tavkhelidze	935	13
Twisted Eikonal Graphs and Structure of the Quasipotential – S. P. Kuleshov, V. A. Matveev, A. N. Sisakyan, M. A. Smondyrev, and A. N. Tavkhelidze	948	30

	Engl.	Russ.
Singular Quasipotential Equation – V. Sh. Gogokhiya and A. T. Filippov	954	37
Legendre Transforms in the Ising Model – A. N. Vasil'ev and R. A. Radzhabov	963	49
Finiteness of the Discrete Spectrum in the Quantum n- Particle Problem – G. M. Zhislin	971	60
Dissociation and Formation of Negative Ions in Slow Collisions with Atoms. Allowance for the Quantum-Mechanical Nature of the Motion of Atoms in the Case of Horizontal Position of the Boundary of the Continuous Spectrum – A. Z. Devdariani and Yu. N. Demkov	981	74
Spectrum and Correlation Functions of an Anisotropic Heisenberg Antiferromagnet. I. Antiferromagnetic Phase in the Generalized Hartree–Fock Approximation – V. I. Lymar' and Yu. G. Rudoi	990	86
Aspects of the Study of Model Hamiltonians of Statistical Physics. I. Basic Theorems for the Free Energy – A. M. Kurbatov and S. S. Lapushkin	1003	103
On the Critical Temperature of Anisotropic and Inhomogeneous Superconductors – V. M. Gvozdikov and I. I. Fal'ko	1009	111
On an Effective Hamiltonian that Describes Quasihomeopolar Excitations in the Framework of the Hubbard Model – V. A. Kapustin	1014	118
Response of a Thermodynamic System to a Slowly Varying Mechanical Perturbation – I. P. Borodin and T. N. Khazanovich	1023	130
Interaction of Two-Quasiparticle and Phonon Excitations in Even–Even Atomic Nuclei – A. I. Vdovin, G. Kyrchev, and Ch. Stoyanov	1028	137
Integral Equations for Equilibrium Distribution Functions – N. K. Bolotin and Yu. P. Yudkin	1035	146

Volume 21, Number 2 November, 1974

Essentially Nonlinear Fields and Vacuum Polarization – D. I. Blokhintsev	1041	155
Essentially Nonlinear One-Dimensional Model of Classical Field Theory – L. A. Takhtadzhyan and L. D. Faddeev	1046	160
Proof of the Bogolyubov–Parasyuk Theorem for Nonscalar Case – S. A. Anikin and M. K. Polivanov	1058	175
Low-Energy Structure of the Feynman S Matrix – V. S. Gerdzhikov and P. P. Kulish	1065	183
Analyticity and Bounds on the Scattering Amplitude at Finite Energies – Yu. S. Vernov	1074	195
Analytic Properties of the Scattering Amplitude in Strong Coupling Theory – S. V. Semenov, O. D. Timofeevskaya, and N. E. Tyurin	1083	207
Kerr and Newman–Unti–Tamburino Type Solutions of Einstein's Equations with Cosmological Term – V. P. Frolov	1088	213
Determination of Closed Expressions for the Perturbation Theory Corrections to the Wave Functions of Bound States by Means of a Sturm Function Expansion – A. I. Sherstyuk	1097	224
Statistical Theory of Viscoelastic Properties of Fluids – F. M. Kuni	1105	233
On the Theory of Quantum Kinetic Processes in Strong Alternating Fields – R. Kh. Amirov, S. A. Smolyanskii, and L. Sh. Shekhter	1116	247
Generalization of the Minimax Principle for Model Quasispin Problems – N. N. Bogolyubov, Jr., A. G. Shumovskaya, and A. S. Shumovskii	1125	258
Summation of Topologically Equivalent Diagrams in the Ising Model – N. F. Balakhonov and S. N. Isakov	1131	266
Thermodynamic Properties of Superconductors with Paramagnetic Impurity under Pressure – M. E. Palistrant and A. T. Trifan	1141	279

Volume 21, Number 3 December, 1974

Nikolai Nikolaevich Bogolyubov (Fifty Years of Scientific Work) – V. S. Vladimirov and A. A. Logunov. 1155 299
New Bounds on the Distribution Function of an Inclusive Process – A. A. Logunov, M. A. Mestvirishvili, and V. A. Petrov 1160 305
Generating Functional for the S Matrix in Gauge-Invariant Theories – I. Ya. Arefʹeva, A. A. Slavnov, and L. D. Faddeev 1165 311
Comments on the Structure of the R-Operation – O. I. Zavʹyalov 1173 322
Theory of Dynamical Affine and Conformal Symmetries as the Theory of the Gravitational Field – A. B. Borisov and V. I. Ogievetskii 1179 329
Phase Transition with Change of Symmetry as Bifurcation of the Solution of a Nonlinear Integral Equation – E. E. Tareeva. 1189 343
Quasiinvariants of the Motion and Existence of the ε-Limit in the Nonequilibrium Statistical Operator Method – M. I. Auslender. 1198 354
Coherent States in the Problem of the Establishment of Statistical Equilibrium in a System Coupled to a Thermal Bath – M. N. Yupina. 1208 367
Projection Formalism in the Theory of Irreversible Processes – V. P. Vstovskii. . . . 1214 376
Limit Distribution Functions in Classical Statistical Physics – G. I. Nazin. 1223 388
Generalized Transport Equations in the Theory of Irreversible Processes – M. V. Sergeev 1234 402
Dispersion of the Permittivity Tensor of Ionic Crystals in the Exciton Region – A. F. Lubchenko, V. M. Nitsovich, and N. V. Tkach. 1244 415
On the Residual Resistivity of a Metal – S. S. Krotov 1250 424
